

All Terrain Wheelchairs

Mobility International, Inc. and The Red Thread Promise team to bring all terrain wheelchairs to Haiti.

Mobility International and The Red Thread Promise need your help to ship # all-terrain wheelchairs to Mountain Top Ministries (MTM) in Haiti. MTM is a well established institution, providing a school, clinic and surgery center to impoverished mountain people of Haiti. One of their chief priorities is to help their fellow Haitians take ownership of their nation and work to defeat generational poverty, village-by-village.

The Red Thread Promise (TRTP) has a well-established relationship with MTM. Kathy, founder of TRTP, a nonprofit organization providing medical care to orphans, travels to MTM on a monthly basis to teach English as a Second Language to MTM's children. Through strong ties between The Red Thread Promise, Mountain Top Ministries and Mobility Intl, we can make a huge impact on the lives of disabled people in Haiti.

There is major need for wheelchairs in these mountainous areas (pictured at top). While beautiful, the Haitian mountains are a constant obstacle to impoverished disabled children, adults and seniors attempting to maneuver through the rough terrain. Mobility's all terrain wheelchairs can provide a life changing experience for these people.

The ATW-01 all terrain wheelchair

ATW-01 HIGHLIGHTS

- Rugged all-purpose manually powered vehicle
- Suitable for a wide range of use; from hospitals to city streets to off-road terrain
- Heavy duty construction ideal for passage over rocks, potholes, bomb craters and steep ascents and descents characteristic of the road and path ways where it is most critically needed
- Easily disassembled and re-assembled for ease of transportation as well as repair
- Common bicycle wheels and other readily available parts are used as replacements
- Assembly and repair instructions included

ATW-01 FEATURES

- Heavy duty frame
- Mountain bike tires
- Side-to-side automatic flex suspension for uneven terrain
- Extended front end for front-to-rear stability
- Small front wheels easily mount curbs, rocks, roots and road holes
- EX replaceable cushion reduces or eliminates body sores

RETAIL

\$ ___ - adult \$ ___ - child \$ ___ - repair kit

CONTAINER

20 ft. landed in Central USA \$ _____;
Quantity _____

40 ft. landed in Central USA \$ _____;
Quantity: _____

*Landed costs include freight and US duties and port charges.
Special quotes are required for destinations other than the
Central USA. Prices are subject to change as costs rise and fall.*

Deprived children will be able to attend classes because they will no longer rely on an adult to carry them to school. Adults will be able to better care for themselves through their improved mobility and gain more independence.

MTM has a well-equipped workshop at their facility and is eager to provide their expertise by training Haitians how to assemble and completely maintain the wheelchairs. Mobility International will supply spare parts and maintenance kits for the wheelchair.

It is our goal to send an entire 20 ft container of ___ wheelchairs to Mountain Top Ministries. In order to do so, we need your support. Please consider donating to The Red Thread Promise to make this goal a reality for the disabled people of Haiti.

DONATE NOW!

Donations for the Haiti wheelchair project can be sent to:

The Red Thread Promise

4027 Dauphine Street
New Orleans, LA 70117
Subject line: ATW-01 Haiti

PayPal donations can be made through TRTP's website at redthreadpromise.org.
